PROFESSIONAL SUMMARY

First Class Honours BSc Data Science & AI graduate from UWE Bristol, skilled in Python, machine learning, deep learning and statistical modelling. Built end-to-end ML systems including a music recommender on 114K+ Spotify tracks and a 99.75%-accuracy career-prediction model. Two-time hackathon winner and Data Analyst Intern at City Mart Holding, cutting reporting time by 40%. Open to graduate Data Scientist roles in the UK to turn data into predictive insights.

SKILLS

Programming & Querying: Python, SQL, R, Java

Machine Learning & Deep Learning: Scikit-learn, XGBoost, LightGBM, TensorFlow, PyTorch, Neural Networks

Statistics & Modelling: Statistical Analysis, Hypothesis Testing, Predictive Modelling, Feature Engineering, ML Pipelines

Data Tools & Visualisation: Pandas, NumPy, Matplotlib, Plotly, Power BI, Tableau

Tools & Platforms: Jupyter Notebook, Google Colab, Git, GitHub, MySQL, MongoDB, AWS, SAP HANA

FEATURED PROJECTS

- **MoodTunes AI** | Python · LightGBM · Scikit-learn | Built a music recommendation model on 114K+ Spotify tracks using engineered audio-feature vectors and cosine similarity (F1 0.57).
- **IT Career Planner** | Python · XGBoost | Trained a multi-class classification model mapping skills to IT career paths at 99.75% accuracy (F1 0.9975), validated with 5-fold stratified cross-validation on 6,000 samples.
- **DATA_CHAIN** | Python · SARIMA · Gurobi | Built demand-forecasting models (SARIMA, linear regression) and optimised supply-chain distribution via integer linear programming, identifying £7.4M optimal profit.
- **PreventPath** | TypeScript · LLM · NHS APIs | Engineered an NHS preventive-care system integrating live data from 4 sources with an LLM layer over a deterministic clinical engine; 2nd place at VibeHack London (UCL).
- **CityPulse** | Python · LangGraph · Gemini | Built an AI agent that researches live data and scores city risk zones, rendering real-time 3D risk maps; Google × CopilotKit Hackathon, London.

WORK EXPERIENCE

Data Analyst Intern | April 2025 – June 2025

City Mart Holding (CMHL), Yangon, Myanmar

- Extracted, cleaned and prepared large-scale sales datasets from SAP HANA across 100+ branches, ensuring 100% data quality for downstream analysis.
- Analysed weekly and monthly sales trends using SQL and statistical methods, identifying top-selling products contributing 30% of total revenue.
- Built Power BI dashboards translating complex data into actionable insights, cutting reporting time by 40% and supporting marketing decisions.

Software Engineer Intern | September 2024 – February 2025

KBZ Pay, Yangon, Myanmar

- Developed a QR code payment flow generating dynamic codes with embedded amounts, contributing to a platform serving 5 million+ users.
- Optimised transaction list API response time, improving user experience across millions of daily transactions.
- Integrated third-party telecom APIs (MPT, Ooredoo) to develop a mobile top-up feature, expanding platform functionality.

EDUCATION

BSc (Hons) Data Science & Artificial Intelligence | September 2025 – June 2026

University of the West of England, Bristol | First Class Honours

Higher National Diploma (BTEC Level 4–5) in Computing | November 2022 – November 2024

GUSTO College, Yangon, Myanmar | Distinction

ACHIEVEMENTS & CERTIFICATIONS

Jun 2026 — **2nd Place, VibeHack London** | University College London

Mar 2026 — **Data Analysis & Machine Learning** | Ace of Data

Aug 2025 — **Introduction to Programming Using Java** | Technortal

Jul 2025 — **Regen Asia Summit 2025** | National University of Singapore

May 2025 — **Introduction to Programming Using Python** | Technortal

May 2024 — **IOT Challenge Winner** | GUSTO College
